## Eye on the Field, Volume 9, Issue 2, February 2008

### “Acculturation in the Texas-Mexico Border Region: Effects on Drinking Differ by Gender”

1. What are some of the factors that contribute to immigrants drinking more after acculturation to mainstream America?
  - a. Norms in America regarding drinking are more liberal than other countries
  - b. Higher incomes increases ability to purchase alcohol
  - c. Trying to fit in with mainstream Americans lead to increased alcohol use
  - d. Both a and b
2. What are some of the consequences this study discusses related to the increased alcohol use by immigrants as a result of acculturation?

---

---

---

---

---

### “Eye Blinks may help to Identify Children Prenatally Exposed to Alcohol”

3. What are some of the characteristics of this study that help to provide documentation and support to the relationship between eyeblink conditioning and FAS diagnosis?
  - a. Prospective follow-up of children from birth
  - b. Large sample size used in the study
  - c. Measurements gathered of prenatal exposure to alcohol and other drugs
  - d. All of the above
4. Results of this study show that there is a dose-response relationship between FASD diagnosis and alcohol exposure.

TRUE                  FALSE

5. What are some of the implications of the results of this study on the identification and remediation of FAS?

---

---

---

---

---

### “Parental Drinking & Parenting Practices Influence Adolescent Drinking”

6. What were the authors this report hoping to accomplish with the study?
    - a. Identify the extent to which drinking behaviors of parents and their adolescent offspring were related
    - b. Determine how much of the association was due to the impact of drinking on the parents ability to parent responsibility
    - c. Both a and b
    - d. None of the above
  7. What were the two main findings of the study and how can they help develop ways to curb adolescent drinking in the future?
8. Results of this study show that parental alcohol use and/or abuse lead to an increase in monitoring and a decrease in discipline, which can lead to a greater risk of adolescent alcohol use by their offspring.

TRUE                  FALSE

### “Rodent Study Shows that Chronic Drinking Can Lead to Severe Pneumonia after Surgery”

9. What are some of the complications that can arise following surgery in patients who consume alcohol prior to being admitted?

---

---

---

---

---

10. Results of this study show that it is important for doctors to ask their patients not only if they drink but specifically what amount they drink per day.

TRUE                  FALSE
