Clinical Supervision: A Key to Treatment Success

A Two-part Training Series

Gadsden, Alabama
October 13 - 15, 2009
9:00 – 4:30 p.m. daily

The Clinical Supervisor plays a critical role in achieving successful treatment outcomes. Skillful supervision helps counselors to develop skills and increase competency. This workshop series will help both new and experienced supervisors to provide appropriate mentoring for clinicians based on national standards of counselor competency.

Target Audience

The Southern Coast ATTC is offering a series of two clinical supervision training events for persons who currently hold a Clinical Supervisor position within addiction treatment agencies. This series is part of a national study of ATTC clinical supervision training; therefore, strict adherence to the target audience is required.

Fee

SCATTC is offering this series at no cost for up to 24 persons. We ask that you commit to attending the entire clinical supervision training series – a three-day face-to-face training event and a one-day booster training which will be held on 11/17/2009 from 9:00 – 4:30 p.m.

By signing up for this clinical supervision event, you will be invited to take part in data collection activities that are being conducted as part of a national ATTC Network-wide evaluation. The purpose of this data collection effort is to learn about your perceptions and experiences after receiving ATTC clinical supervision training in order to assess the value of each training event and its impact on adoption and implementation of clinical supervision skills. Your participation in this training is not contingent upon participation in the national study, as your participation in that evaluation is voluntary.
Purpose

The first training event is a three-day workshop which focuses on the teaching and mentoring aspects of clinical supervision in addiction treatment settings. Participants will increase their ability to assess the clinical skills of counselors and to build learning plans that will assure their continued professional growth. The workshop includes presentations, demonstrations and hands-on learning activities. The Center for Substance Abuse Treatment (CSAT) Technical Assistance Publication (TAP 21): Addiction Counseling Competencies: The Knowledge, Skills, and Attitudes of Professional Practice is the basic reference document for the workshop.

Participants in this workshop will be able to:

- Understand the tasks and functions of the clinical supervisor
- Improve personal ability to give effective job performance feedback
- Construct a supervisory interview to achieve specific goals
- Demonstrate familiarity with the Addiction Counseling Competencies: The Knowledge, Skills, and Attitudes of Professional Practice
- Assess counselor proficiency in the Competencies
- Design a learning plan to increase counselor performance

The booster training will take place within two months of the first course. It takes participants to the next level in clinical supervision and provides the opportunity for additional skill development. The course reinforces clinical supervision skills, and adds practice in corrective interviewing and ethical decision-making.

Continuing Education

18 Continuing Education Units/Contact or Clock Hours are available for the first course and 8 are available for the booster training for the following disciplines:

- Florida Certification Board Provider #5033-A, Exp. Date 12/31/2009
- Florida Board of Clinical Social Work, Marriage and Family Therapy and Mental Health Counseling Provider #50-1836, Exp. Date 03/31/2011
- Florida Board of Nursing Provider #50-1836, Exp. Date 10/31/09
